DIGITAL GOVERNMENT COMMITTEE

1. Message to Candidate

> At Digital Government Committee, we are dedicated to building citizen trust through innovative digital solutions that not only empower communities but also contribute to the development of our country. We aim to put our country on the world map by delivering advanced, impactful digital products and services. By joining us, you will play a crucial role in creating transparent, reliable solutions that shape the future of our nation and strengthen public confidence. **Together, we can build a better tomorrow and elevate our country's presence on the global stage.**

2. General Information

Organization	Digital Government Committee
Job Title	DevOps Engineer
Level	-
Location	DGC Olympia
Employment Type	Full time
Salary	Negotiation

3. Role Summary

We are looking for a skilled DevOps Engineer to manage and automate cloud infrastructure, CI/CD pipelines, and deployment processes. The role focuses on ensuring system reliability, security, performance, and high availability while supporting production operations and continuous improvement.

4. Key Responsibilities

Accountability & Responsibility

- Take ownership of production systems and operational stability.

- Respond promptly to production incidents and drive issue resolution.
- Willing to work after hours, overnight, or on weekends when required for critical incidents, deployments, or maintenance.
- Demonstrate accountability, ownership, and commitment to service reliability.

Infrastructure & Automation

- Design, implement, and maintain scalable infrastructure using cloud platforms (AWS, Azure, GCP, or private cloud).
- Develop and manage CI/CD pipelines to automate build, test, and deployment processes.
- Implement infrastructure as code (IaC) using tools like Terraform, Ansible, or CloudFormation.
- Implement and maintain monitoring, logging, alerting, and backup solutions to ensure system reliability and observability.
- Ensure infrastructure and deployment processes comply with organizational security, governance, and compliance standards.
- Optimize system performance, availability, and security to ensure operational excellence.

Collaboration & Improvement

- Work closely with developers, QA, and system administrators to streamline software delivery.
- Troubleshoot and resolve issues across development, testing, and production environments.
- Maintain documentation for infrastructure, processes, and best practices.
- Stay updated with DevOps trends, tools, and emerging technologies to drive continuous improvement.

5. Qualifications

- Bachelor's degree in IT, Computer Science, Network Engineering, or related field.
- Bachelor's degree in Computer Science, Software Engineering, or related field.
- Minimum 3 years of hands-on experience in DevOps or related roles.
- Strong proficiency with CI/CD tools (e.g., Jenkins, GitLab CI, GitHub Actions, Azure DevOps).

- Experience with cloud platforms (AWS, Azure, GCP) and containerization (Docker, Kubernetes).
- Knowledge of monitoring/logging tools (Prometheus, Grafana, ELK stack, etc.).
- Familiarity with scripting languages (Python, Bash, Shell, or PowerShell).
- Understanding networking, system administration, and security best practices.
- Experience with version control systems (Git).
- Strong problem-solving skills, attention to detail, and collaborative mindset.

6. How to Apply

- Please submit your CV and required information through the form below.
