DIGITAL GOVERNMENT COMMITTEE

1. MESSAGE TO CANDIDATE

"At Digital Government Committee, we are dedicated to building citizen trust through innovative digital solutions that not only empower communities but also contribute to the development of our country. We aim to put our country on the world map by delivering advanced, impactful digital products and services. By joining us, you will play a crucial role in creating transparent, reliable solutions that shape the future of our nation and strengthen public confidence. **Together, we can build a better tomorrow and elevate our country's presence on the global stage.**"

2. GENERAL INFORMATION

Organization	Digital Government Committee - DGC
Job Title	Backend Developer
Level	Senior
Location	DGC Olympia
Term	Full time
Salary	Negotiation

3. ROLE SUMMARY

Senior Backend Developer is responsible for designing, modifying, developing, and implementing software programming applications and components, often in a team-based setting. This role requires strong knowledge of the .NET framework and proficiency in coding languages like C#, ASP.NET, and SQL Server.

4. RESPONSIBILITY

- Design, develop, test, and deploy robust, maintainable, and scalable web applications using ASP.NET MVC, Web API, or Razor Pages
- Write clean, efficient, and well-documented code adhering to best practices
- Collaborate with designers and product managers to translate requirements into technical specifications
- Implement secure coding practices and data protection measures
- Participate in code reviews and mentor junior developers
- Troubleshoot and resolve complex application issues
- Stay up-to-date with the latest .NET technologies and trends (ASP.NET Core, Entity Framework Core)
- Experience with cloud deployment platforms (Azure, AWS) (a plus)

- Experience with DevOps practices and CI/CD pipelines (a plus)
- Design, develop, and maintain efficient, reusable, and reliable .NET code.
- Participate in the entire application lifecycle, focusing on coding, debugging, and troubleshooting.
- Translate application storyboards and use cases into functional applications.
- Help maintain code quality, organization, and automatization.
- Collaborate with project managers and other developers to plan, design, develop, test, and maintain web-based applications.
- Conduct peer reviews and provide feedback for continuous improvement.
- Perform unit and system level testing on applications.
- Investigate and develop skills in new technologies.
- Assist the team in resolving technical difficulties that occur within system operations.
- Provide technical support for web, desktop, or mobile applications.

5. QUALIFICATIONS

- Bachelor's degree in Computer Science or a related field.
- Proven experience as a .NET Developer or Application Developer with strong knowledge of .NET web framework.
- Familiarity with architecture styles/APIs (REST, RPC).
- Proficiency in C#, ASP.NET, SQL Server, and design patterns.
- Advanced knowledge of JavaScript, HTML, and CSS.
- Understanding of Agile methodologies.
- Strong attention to detail.
- Excellent troubleshooting and communication skills.
- Certification in relevant fields can be advantageous.
- Able to work well under pressure and meet tight deadlines.

6. HOW TO APPLY
